PROFESSIONAL SUMMARY

Result-driven professional with expertise in designing, implementing, and maintaining robust software applications. Proficient in Java, JavaScript, Typescript, React and Object Oriented Programming concepts. Skilled in database management including SQL and NoSQL. Committed to continuous learning, adaptability, and creative problem-solving. Seeking to contribute technical technical proficiency, innovation and collaboration to a dynamic software development team.

SKILLS

Java | C | JavaScript | TypeScript | SQL | OOPs | WCD | ORM | Hibernate | RDBMS | MongoDB | React.js | Node.js | Next.js | jQuery | Redux | AJAX | XML | ES6+ | HTML5 | CSS3 | Sass | Bootstrap | Git | GitHub | Web Development | App Development | Frontend | REST API | API Integration .

Effective Communication English , Hindi, Marathi - **All professional proficiency.**

SKILLS

Online Shopping System

(SpringBoot, React.js, Redux, Spring MVC, MySQL, HIbernate)   *Present*

- Designed the database for the application and simplified the database operations using ORM.
- Built the responsive and interactive UI using React.js .
- Handled navigation using React Router throughout the application.
- Managed the state of the application using React Redux.
- Integrated PayPal for secure, seamless, and efficient online payment processing.

Employee Management System

(Java, Servlets, JSP's, Hibernate, OracleDB)   *Nov 2023*

Matrimony Web Application

(Next.js, JavaScript, React, Redux, Sass, MongoDB)   *Mar 2023*

- Built the UI using Next.js to achieve server side rendering and to neglect external dependencies for routing.
- Managed the state of the application using React Context.
- Implemented user authentication and authorization using NextAuth.js.
- Integrated Stripe for secure, seamless, and efficient online payment processing.
- Using Sockets for real time communication between users.
- Stored the user information in the form of collection.

AI Chatbot - OpenAI API

(TypeScript, JavaScript,AJAX, OpenAI API, HTML, CSS)   *Dec 2022*

- Designed an AI chatbot using react.js which generates the response based on users input.
- Integrated the natural language processing OpenAI API which allows users to interact in the form of text.
- Provided the type safety to the application using TypeScript and made the UI interactive using CSS3.
